As of April 15, 2023, deadlines for updating to the current edition of a standard will be either June 30 or December 31 following the three-year date from when the standard was issued by the NFPA Standards Council and approved as an ANS. See the *IFSAC (Three-Year) Accredited Entity Update Compliance Procedure* for complete information.

TBD: NFPA has yet to determine when the next edition may be published. For more information visit nfpa.org.

*Per the CABOG, 2017 Fall Meeting, entities are approved to maintain NFPA 1006, 2013 edition in lieu of updating to the 2017 Edition. Entities have up to three years following approval of the next edition of NFPA 1006 anticipated for 2021. This does not prohibit entities from being accredited to the 2017 Edition if they so choose.

*On August 10, 2023, the CABOG approved an extension for accredited entities to update Technical Rescue levels to the current edition of NFPA 1006. The deadline to update has therefore been changed from 12/31/2023 to 12/31/2024.
